Software Requirement Specification

Purpose:

A graphic editing apparatus allows a user to edit graphic objects in a drawing space. A method for graphically editing a software application includes displaying a graphical user interface for the software application to a user on a display device.

Scope:

Graphic editors create visual concepts, using computer software or by hand, to communicate ideas that inspire, inform, and captivate consumers. They develop the overall layout and production design for various applications such as advertisements, brochures, magazines, and corporate reports.

Requirements:

1. Functional Requirements

a. The entry of an editor.

b. Software to edit.

2. Non-functional Requirements

a. The database storing the details must be secured.

b. The system should be easy to work with.

c. The response time should be very small.

d. The system should be developed within the specified budget.

3. User Requirements

a. Consumers copyrights

b. Administrator's authentication.

c. Developers access to the system.
